Summary

Master's student in **Web Intelligence and Data Science (WISD)**, currently in a double-degree program with Sorbonne Paris Nord, with hands-on experience building **retrieval-augmented generation pipelines**, **agentic LLM systems** (LangGraph, tool-calling, multi-backend integration), and NLP applications for semantic search and cross-lingual text generation. Strong Python foundations across Scikit-learn, PyTorch and modern data tooling. Seeking a 6-month research internship to contribute to production-grade RAG systems for regulatory document analysis.

Academic & Personal Projects

Retrieval-Augmented Generation (RAG) Chatbot [\[repo\]](#)

Built a **RAG pipeline from scratch** (Python, Ollama, Flask, React) covering document chunking, **embedding-based retrieval**, and LLM-grounded response generation.

Agentic AI Chat Assistant [\[repo\]](#)

Multi-agent conversational system (FastAPI + **LangGraph** + Groq LLM) with real-time streaming and **tool-calling** (Tavily web search) – agent orchestration and LLM backend integration.

AI Resume Screening & Job Matching System

NLP application matching resumes to job descriptions using **document embeddings and semantic similarity search**; includes text preprocessing, embedding-based candidate ranking, and REST API integration.

English–Darija LLM Translator [\[repo\]](#)

LLM-based translation tool for a low-resource language pair, exploring prompt engineering for **cross-lingual** text generation.

Web Spam Detection System

End-to-end NLP classification pipeline (Flask API + React frontend) using **FastText embeddings** and an MLP classifier; covers preprocessing, model training and evaluation.

Agentic AutoML Platform

Full-stack platform (React + FastAPI) where an **LLM agent (LangGraph)** orchestrates the ML workflow end-to-end – from raw dataset to a trained model – plus a **recommendation chatbot** that suggests techniques to further improve model performance.

Certifications

- Oracle Cloud Infrastructure Foundations (2026)
- Oracle Cloud Infrastructure AI Foundations (2026)
- PCEP – Certified Entry-Level Python Programmer

Education

Double Master's Degree (France–Morocco) in Artificial Intelligence and Data Science

Sorbonne Paris Nord University (France) & Sidi Mohamed Ben Abdellah University – Faculty of Sciences Dhar El Mahraz (Morocco) Sep 2025 – July 2027

- M2 in Data Exploration and Decision-Making (EID²) – Sorbonne Paris Nord University (*in progress*)
- M1 in Web Intelligence and Data Science (WISD) – Sidi Mohamed Ben Abdellah University

Bachelor's Degree in Mathematics and Computer Science

Sidi Mohamed Ben Abdellah University – Faculty of Sciences, Fès (Morocco)

Sep 2021 – Aug 2025

Skills

- **AI & Data Science:** Machine Learning, NLP, LLM, Retrieval-Augmented Generation, Computer Vision, Data Analysis
- **LLM Tooling & Orchestration:** LangGraph, Ollama, Groq API, tool-calling / agentic workflows, FastAPI
- **Programming:** Python, Java, SQL, R, JavaScript
- **Frameworks & Libraries:** Flask, PyTorch, Scikit-learn, OpenCV, Pandas, NumPy, React, Laravel
- **Data Processing & Evaluation:** Feature engineering, embeddings, semantic similarity, model evaluation
- **Workflow & Collaboration:** Git, Jupyter, Kaggle, VS Code, Google Colab, Agile/Scrum
